Rescue equipment

Saurus rescue vehicles are equipped with operational fire and rescue equipment to suit each individual customer. Our long term cooperation with equipment manufacturers and importers, together with decades of experience, ensure the best possible combination and end result.

Technology ensures safety in rescue work

Fire engines • Rescue vehicles • Special vehicles • Components • Rescue equipment

Saurus vehicles also assist Finland's defence forces. Agreement-based Saurus maintenance ensures that these vehicles are constantly ready for use.

Testimony to the excellent quality and product control of Saurus is the company's achievement of AQAP 2110 certification.
